Dear Mr. [REDACTED]

This is in reply to your report of two aerial objects which you were unable to identify on 23 August 1965.

It is possible that you observed two of the satellites, satellite components, or space debris which are visible to the naked eye. Since the objects were on the same course, it is also possible that two high flying aircraft were observed.

Thank you for reporting to the Air Force.

Sincerely,

J. W. B. PAULSON

Reference the attached letter from [REDACTED] requesting evaluation of an observation on the morning of 23 Aug 65. Mr [REDACTED] assumed that the observation was a satellite. A check with the Echo and Pegasus schedules indicated no passage for the time period indicated in his letter. It is possible that he observed two of the other satellites, satellite components, or space debris visible to the naked eye. Since the observations were on the same course, it is also possible that two high-flying aircraft were observed.
